 OFFER EXPIRES APRIL 1, 2012

IT'S TIME TO TIGHTEN UP THAT MID-SECTION

Loose or worn articulation joints can cause erratic steering response, deteriorated ride quality, and make the machine difficult to control when roading.

Brooks Tractor would like to help you get your center joint back in shape and give your tractor that new machine feel once again.

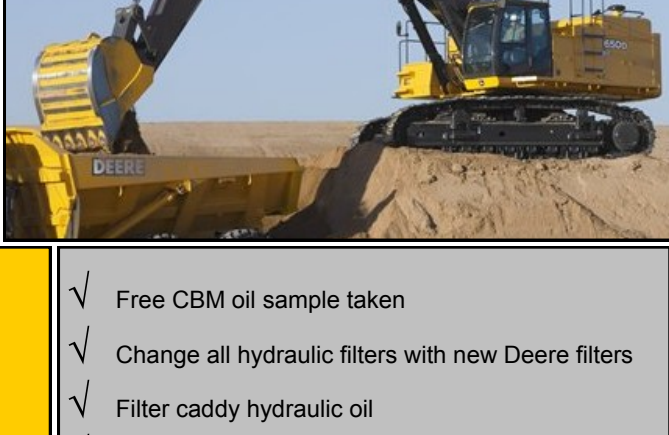

Brooks Tractor articulation joint special includes parts and labor to replace the upper and lower pins, bushings, spacers, and shims needed to bring your articulation joints back to new specifications.

Line bore and machining services are additional if necessary.

Special offer is good for in shop services at one of our 4 locations.

EXCAVATOR TUNE-UP SPECIAL

**Performance can drop 20%
